

Desert Rose (Adenium) Care

Light: morning sun or filtered sun

Watering: Once a week with a good soak April through Mid-November.

****NO WATER** from Late November to March(This includes rain water)

Fertilize: once a month April through November.

Dormant Season: Late November through March. All leaves will turn yellow and fall off as well as the flowers. Put the plant under a patio to protect it from getting rained on or frostbite. The plant needs nothing at this time.
